---

Good afternoon Honorable PCE Board of Directors,

In this edition of the PCE Board's weekly newsletter, we'd like to share the following:

1) Peninsula Clean Energy Press Event
PCE held a press event on Wednesday morning at the Hillsdale Shopping Center to announce the completion of our rollout and that we're now the largest CCA in California. The press kit with the two press releases is attached to this email.

2) Dave Pine and Jan Pepper meet Senator Dianne Feinstein:

Dave and Jan were honored to meet with Senator Dianne Feinstein today at the Silicon Valley Leadership Group's "Fireside Chat with Senator Feinstein". Senator Feinstein provided a substantive update from Washington, DC and urged attendees to contact the Republican Congress people from California's Central Valley to stop holding up the approval of federal funds to electrify CalTrain. She also encouraged Dave Pine to do a stellar job as the Chair of the San Francisco Bay Restoration Authority. She must already know what a great job Dave is doing as the Chair of PCE!

3) PCE is hiring! Renewable Energy Analyst position has been posted:

Please let all interested parties know that PCE is hiring! A position for a Renewable Energy Analyst has been posted on the PCE website: https://www.peninsulacleanenergy.com/learn-more/join-our-team/ The position will be open until May 3.

4) PCE Board Energy Industry Introduction Training:

We invite you to attend a 2-hour introductory training session on the energy industry, key terms, and clean energy basics. Although this training is designed for new members on the Board, all Board members are invited to attend to get a refresher.

The PCE Board Energy Industry Intro will take place the week of May 15th, probably in Redwood City. The actual location will depend on how many people can attend. In order to accommodate as many people and as many schedules as possible, we've created a Doodle Poll to check availability.

If you are interested in attending this training, please take a moment to complete this Doodle Poll and select every day and time that you would be available during the week of May 15th: http://doodle.com/poll/cr2gzw4mxpnrmrs9 **Please respond by April 30th**

5) The Citizens Advisory Committee Application deadline is April 30th:
Please help us spread the news that the application for the Citizens Advisory Committee is on the PCE website, and the deadline to apply is April 30. See https://www.peninsulacleanenergy.com/learn-more/citizens-advisory-committee. We've sent notices through our email newsletter, city contacts, and social media. Please help us reach out to potential candidates. Our goal is to have a committee with members from all over the county, with diverse community and business perspectives.

6) Op Ed by Dave Pine and Carole Groom: Peninsula Clean Energy now serving entire county
http://www.smdailyjournal.com/articles/opinions/2017-04-18/op-ed-peninsula-clean-energy-now-serving-entire-county/1776425178923.html

7) CalCCA Quarterly Statewide Update for April 2017 (please see attached)

8) Article: L.A. County creates a lower-cost alternative for Southern California Edison customers
The Los Angeles Board of Supervisors has approved the Los Angeles Community Choice Energy Authority, which will allow cities in Los Angeles County to join a JPA to have community choice energy.
http://www.latimes.com/business/la-fi-county-utility-20170418-htmlstory.html

9) Article: California's solar energy set power supply record in March
http://abcnews.go.com/Technology/wireStory/californias-solar-energy-set-power-supply-record-march-46730503?cid=share_facebook_widget

Have a great Earth Day! PCE will be tabling at multiple events around the county tomorrow!

Thank you,

Jan
